

Creative Developer with Startup dreams

Job Description

Are you a talented, creative developer who wish to be part of a very exciting startup journey?

We are looking for a dedicated person who will help us create amazing solutions based on our vision to create better and more efficient transportation systems. We hope that you have an ambition to be part of a startup journey from becoming the first employee to what we believe will become a passionate and high-performing team of experienced and competent engineers, designers and business people.

Skills & Requirements

To be the perfect match you need to solve complex problems and be open to using new technologies and tools that you might not have worked with before. Absolutely crucial is also that you are self-motivated to deliver top quality solutions by finding new ways of solving problems and tasks even if they are not specified in detail. In other words you need to be comfortable working out-of-the-box with moving targets.

We believe that your mindset is more important than the details of your resume but would ideally like to see that you have previous experience from developing advanced front end applications using techniques such as HTML5, CSS3, JavaScript, or .NET.

About All Binary AB

All Binary AB is a startup with big ambitions to be become a leading force in creating better and more efficient transportation systems. We are already a strategic supplier to regional public transportation organizations and won the prestigious regional award Guldeken during 2012 for best Innovation in Blekinge. By applying creative solutions with a focus on usability to an industry where possibilities to improve are huge, we've reached profitability already in our first year of operation and continue to develop our brand and reach to establish new strategic customer relationships.

If you have what it takes and are interested to join the ride send your application to:
